Battery Cover iPhone 5/5s

Battery Cover is a cover for iPhone 5/5S with an integrated and powerful rechargeable battery that doubles the autonomy of your iPhone providing you with a pocket reserve of energy.
Battery cover is a portable energy reserve equipped with a MicroUSB socket to recharge the built-in battery along with your iPhone through any USB port or wall/car charger. The supplied cable allows you to synchronize data without removing the phone from the cover. Lightweight and thin, it is a very useful accessory, especially to travellers.
